

**Question:** It seems that Cyprus is getting ready now to be, like, maybe the hub for humanitarian corridor or aids to Gaza. Are you coordinating your facilities there and your operations with Cyprus? And when it would start?

**Deputy Spokesman:** We don't have any details on that at this point. Once things are firmed up, we can provide more. But we are thankful, of course, to all the various countries who've been providing us both with aid and with means of distributing, including, of course, the Egyptians through Rafah and the others who are expressing their willingness, such as the Government of Cyprus.
